GitHub: <https://github.com/treyarnold> | LinkedIn: <https://www.linkedin.com/in/trey-arnold/>
Portfolio: <https://heytrej.dev/>

Full Stack Web Developer with an eye for inter-functionality and breaking down problems. Enjoys utilizing experience with client facing roles to clearly convey designs and maintain usability as a focus while keeping client needs first. Passionate about creating function with form and approaching challenges from new directions. Holds communication in high regard; works well when collaborating with others or independently.

Technical Skills: JavaScript, jQuery, Node, MongoDB, Git, Github, API, HTML5, CSS3

APPLICATIONS BUILT

Project 1 | Full Stack Developer

- RESTful app where you can add, comment and review campgrounds. Authentication is used for all paths after the initial show page
- Using the new bootstrap card-deck, I came up with a solution to wrap all the campsites inside the deck and dynamically change the number of cards per row based on view size and number of cards in the DB
- Tools/languages used: Node, MongoDB, JavaScript, Bootstrap4, HTML5, CSS3
- https://github.com/treyarnold/yelp_camp | <https://campbnb.herokuapp.com/>

Project 2 | Front-end Developer

- Word guessing game using a Harry Potter theme. Your wins and losses are tracked
- I created a virtual keyboard to make the game more user friendly. Letters will disappear as they are used.
- Tools/languages used: JavaScript, Bootstrap4, HTML5, CSS3
- <https://github.com/treyarnold/potterWords> | <https://treyarnold.github.io/potterWords/>

Project 3 | Front-end Developer

- Trivia game using a Game of Thrones theme. Your wins and losses are tracked. Questions are timed.
- 10 random questions are assigned each time you play. Entire bank of options is currently at 20 questions
- Tools/languages used: JavaScript, jQuery, Bootstrap4, HTML5, CSS3
- <https://github.com/treyarnold/TriviaGame> | <https://treyarnold.github.io/TriviaGame/>
